

EP LITHIUM GREASE

RED

Product Description

A multipurpose high temperature grease formulated with lithium thickener, highly refined mineral base oils and anti-oxidation, anti-corrosion, extreme pressure additives. It is suitable for general-purpose industrial applications under medium to heavy operations.

Applications

- Equipment in agriculture, construction, forestry, mining, paper, textile industries
- Suitable for centralized lubrication systems where a good low temperature pumpability required

Usable temperature range: -20 to 130°C

Benefits

- Excellent EP and anti-wear properties
- Good rust and corrosion preventing properties
- Outstanding mechanical and oxidation stability, increases grease service life
- Resistant to water washout

Typical Properties

Items	Method	Typical
NLGI No.	--	2
Thickener type	--	Lithium Soap
Color	Visual	Red
Penetration, Worked, 25°C, 0.1mm	ASTM D217	265
Dropping Point, °C	ASTM D566	186
Copper corrosion (100°C, 24h)	ASTM D4048	1b
Four ball EP, Weld load, kgf, min	ASTM D2596	200

Caution: Keep container closed, and store away from direct sunlight.
Do not mix with other type of greases. Exercise caution when handling.
